Why CPPE?

What will it take to save the planet? Through a series of exercises, we'll think through what climate change means for the future of humanity, and what each of us ought to do about it. Be prepared for active participation and conversation!

2020 Conference Details

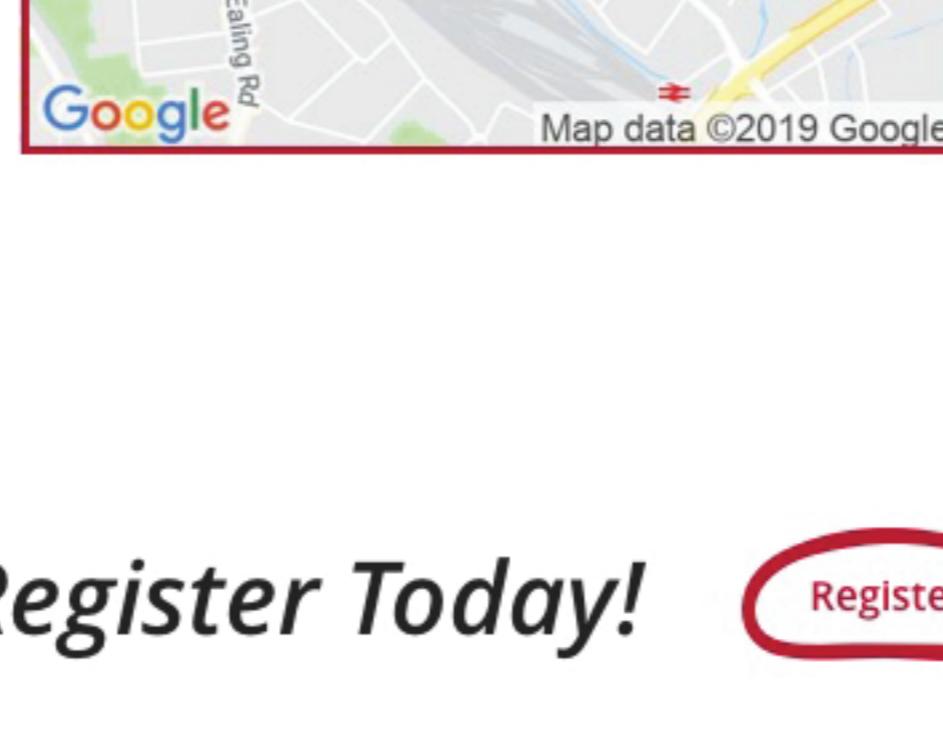

What will it take to save the planet? Through a series of exercises, we'll think through what climate change means for the future of humanity, and what each of us ought to do about it. Be prepared for active participation and conversation!

Saturday, April 19
8:45am - 4:00pm EST

The conference is free to attend!

We encourage you to bring your fellow classmates to our conference! This is our mission statement or words of encouragement to make people want to come because it is free!

Location

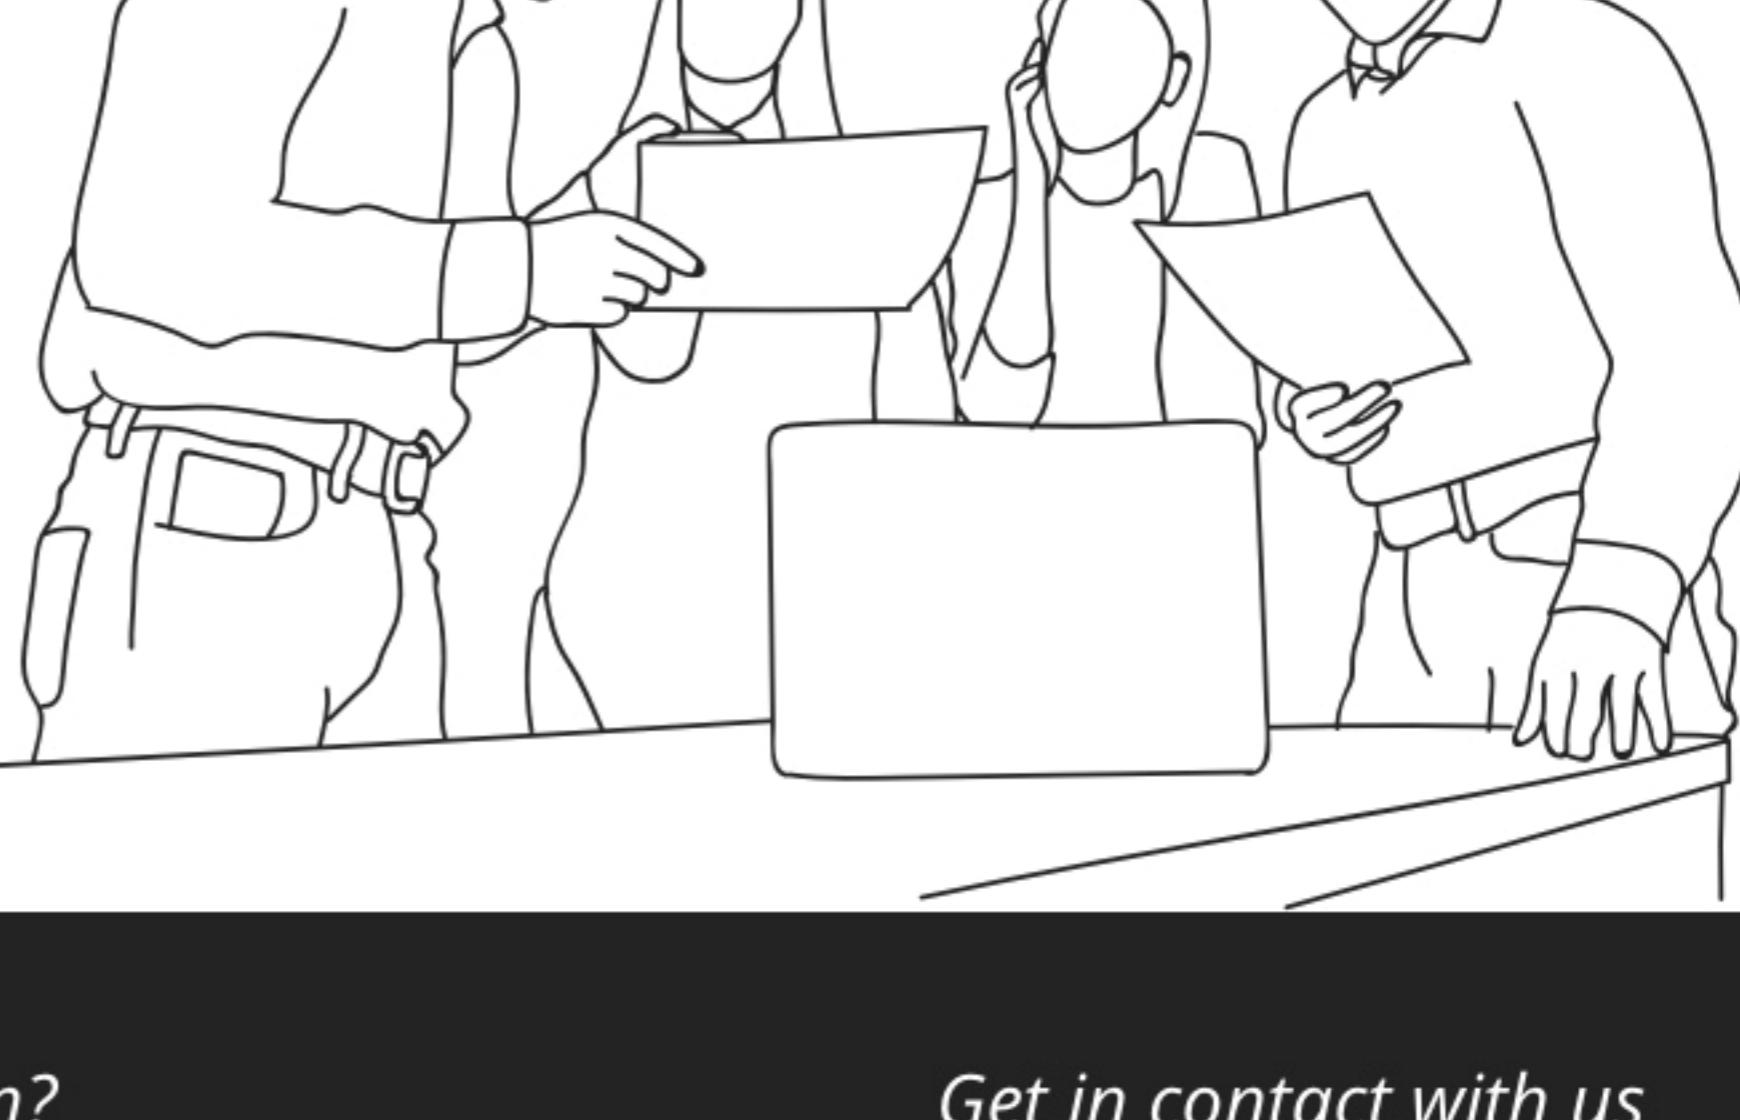

Ball State University
Student Center
1111 North Street Drive
Muncie Indiana

Environmental Ethics

Is your life more valuable than the life of one 🐝? Is your life more valuable than the lives of all the bees? Your answer to this question will change based on what you value and how you value it. In environmental

ethics there are three main perspectives to the question of how we should value non-human life. The first is biocentrism which says that all life is valuable and shouldn't be treated by humans as a means to an end. Biocentrism generally say bugs rule, and people suck if and when they mess with 🐞. On the other hand, anthropocentrism says only humans are morally significant. Basically, people rule, so tough luck, bugs. The third view is that value exists in the relationships between organisms, or between organisms and their nonliving context. This view it is called ecocentrism. In other words, 🐛 rule, 🐛 rule and we need to protect the relationship they share.

me: i love nature ♡ save the bees ♡

bee: *comes near me*

Vandana Shiva

1798-1831

What animals should we or should we not eat?

What value do animals have?

What value do humans have?

What value does an ecosystem have?

How should policies be written with regard to animals, people, and ecosystems?
